

ABSTRACT OF THE DISCLOSURE

In order to make it possible to specify a cell or a module generating an abnormality in a power generating performance (a voltage, a current and the like) without disassembling a fuel battery stack, a gasket for a fuel battery having gaskets on both surfaces of a print circuit for taking out an electric signal within the cell or the module is held between separators, and an electric signal take-out portion for taking out an electric signal (the voltage, the current and the like) is integrally assembled together with a seal.
